**TyTek Medical Announces Exclusive US Distribution Agreement
with H&H Associates, Inc.**

ORDINARY, VA — July 19, 2011— Today TyTek Medical of Cincinnati, Ohio announces an exclusive distribution agreement for the United States market with H&H Associates, Inc. for the Tension Pneumothorax Access Kit (TPAK). The TPAK needle kit provides a 14 gauge x 3.25” chest decompression needle packaged in a rugged, compact casing for a reliable solution for treating a tension pneumothorax. The TPAK complies with the performance characteristics listed for U.S. National Stock Number (NSN) 6515-01-541-0635. H&H Associates, Inc. will be selling the TPAK kit under the name “H&H Tension Pneumothorax Needle”.

“We are excited to bring the Tension Pneumothorax Needle into our wide catalog of emergency trauma products,” said Paul Harder, Chief Administrative Officer for H&H Associates. “Having this agreement allows us to bring another high quality device for saving lives to the US Military and to US first responders.”

The agreement covers all sales of the TyTek Medical TPAK for the United States market only. H&H Associates and TyTek Medical have also announced that they have begun work on production of a US made version of the Tension Pneumothorax Needle and intend to have this fully available for the US market by the 4th quarter of 2011.

About TyTek Medical, Inc.: Formally part of TyTek Industries Inc., TyTek Medical, Inc. was split off as a new and separate company in 2011. It specializes in pre-hospital emergency trauma care products such as the TPAK Tension Pneumothorax Needle, TVAC Manual Suction Device and XTricate High Angle/Confined Space Extrication Stretcher. Many of its products have been private labeled and therefore used successfully for many years in both military and civilian environments.

About H&H Associates, Inc.: Founded in 1982, H & H Associates, Inc. has created innovative and cost-effective solutions for our customers. Founded on the core values of customer service, smart solutions, and cost competitiveness, H & H has brought innovation and excellence to military, civilian, and commercial customers in a variety of fields. For the last ten years, H & H brought our expertise to the combat first aid environment for the US military and civilian use. Our ability to design and manufacture low-cost, world class medical bandages and trauma solutions has brought more lifesaving devices to the field than ever before.
